

## Get to know us

We help co-create a home that is synonymous with peace, family, security and heart - around which everyone's life is centred. We know what an important and difficult choice it is to select the finishing elements for our dream place. On the one hand, we focus on rationality - they have to be solid, resistant, durable and economical, while on the other hand, they have to perform a decorative function and fit in with our aesthetics. Only a company with a rich tradition, high sales and a competitive offer has the chance to meet these requirements.

Stolpaw Albud Doors operates for the comfort of our customers. 40 years on the market is proof that we are specialists in our industry. Hard work, persistence, inner motivation - these are the the foundations of what are today solid foundations. As the owners say: "The future is continuous innovation, top quality and professionalism. We are not afraid of change for the better, and we work as a team to achieve success. we work as a team. We focus on solutions that require commitment beyond the prescribed paths. We appreciate our employees who ensure high standards and innovative implementations."

We strive to stay ahead of the competition by introducing pioneering solutions that allow us to generate a harmonious combination of high quality at an extremely attractive price. The variety of individual collections makes it possible to choose a specimen tailored - in terms of technical parameters, colours and decorative elements - to individual needs and tastes. We do not sell doors - we sell security, elegance, top quality and the certainty of the best choice.

# **Our Realisations**

## **Our Values**

### 1 Innovation

The most important forecasting point for the quality of the products we make. We constantly analyse the market situation and react to any changes and trends. We are full of progressive initiatives and ideas that have distinguished our products on the market for many years.

### 02 Integrity

Integrity is the flagship of our company. All our activities are transparent, as we are committed to transparent procedures and are mindful of business ethics. We have established standards by which we conduct our business, which pays off in the form of customer loyalty and good relations with state institutions.

## 03. Creativity

The ability to think outside the box and innovate, which characterises our company, allows us to implement innovative projects. It enables us to solve problems more effectively using non-standard solutions. Taking new initiatives allows us to continuously improve our company and our product range.

## 04 Persistence

The STOLPAW brand has been on the market for 40 years. Customer demands provide new experience and allow us to make better decisions in the future. We are driven by decisiveness and determination. Failures do not faze us, on the contrary, we are able to draw on the contrary, we are able to learn from them and turn them into successes.

## **05.** Responsibility

In this case, our quality can be seen in the way we approach the order. We are in constant contact with the client at every stage of the service. When planning every next step, we take into account all the consequences of the decisions made. Always according to as expected, always on time!

## 06. Flexibility

We are not afraid of change and can adapt to new conditions. Our knowledge and familiarity with the industry are our advantage in gaining a competitive edge. The ability to act quickly, requires multifaceted knowledge, which we constantly deepen to adapt to the needs of the market and our clients.

## We are ECO

Ecology is a very important aspect of our activities. Therefore, we always try to take measures that contribute to the protection of the environment.

One of the measures we take is to use water-based lacquers that are harmless to the environment and do not emit harmful substances into the air during the lacquering process. This allows us to offer our customers products of the highest quality while protecting the environment.

Another way we take care of the environment is by reducing the number of printed offers and mostly sending all documents electronically. By doing so, we reduce the amount of paper needed for printing, which contributes to reducing carbon emissions and protecting the forests.

In addition, as a company we support various foundations that help animals. animals. We buy food and other necessary products for animal shelters to help them in their daily work and provide them with better conditions.

Our company also participates in the posadzimy.pl campaign, in which we plant trees in various places in Poland. In this way, we try to contribute to protecting nature and increasing oxygen production in our environment.

All these activities are important to us because we want to be responsible entrepreneurs and care about the environment.

We believe that everyone has a part to play in protecting the environment, and we are proud that as a company, StolPaw takes actions that help protect our planet. help protect our planet.

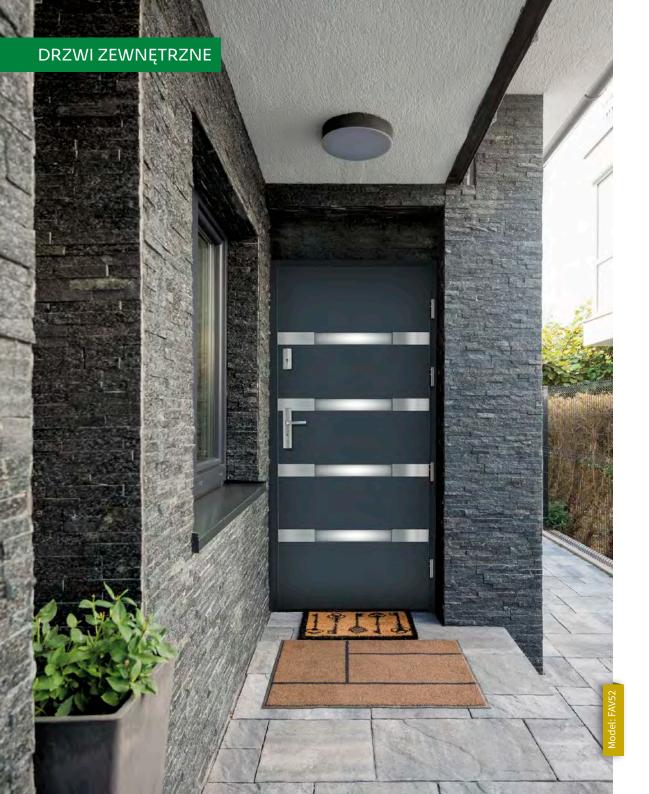

# DOORS EXTERNAL

It is the shop window of our house. We know how important quality, aesthetics and safety are here. Choose the finish that best suits your taste. Our products are airtight and durable. Choose a good buy for years to come!

## **Panel doors**

The entrance door is first and foremost the calling card of our house. It is the first to be seen and a subtle harbinger of the atmosphere inside. It should be elegant above all, but also solid and durable, giving us comfort and a sense of security. The construction is based on a frame of glued laminated wood. The structure is complemented by rigid oak plywood panels, all filled with a thermal insulation board. Reflective energy-saving glazing with low-emission glass is fitted in the panel door, ensuring that heat does not escape outside. The doors have decorative elements made of stainless steel.

TECHNOLOGY **FAVORIT** 

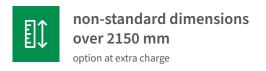

TECHNOLOGY **STOLTERM** 

#### TECHNICAL DESCRIPTION OF DOORS

#### Construction /

- Flush doors
- Doors in rebated system
- Leaf thickness 78mm
- Door leaf frame made of glued, laminated pine
- glued pine with oak strip in the rebate, reinforced with a steel profile "C" 40x20mm steel profile "C" 40x20mm
- The frame filling consists of a thermal insulation board 64mm
- Outer casing of the casement is made of waterproof oak plywood
- Sealing in the sash along the perimeter Anti-balance rebate

#### Frame /

- 95 x 60 mm laminated wood
- Veneered with natural oak veneer
- Seal in frame
- Standard aluminium threshold or wooden threshold with caps

## Finishing

- Five-layer system
- Impregnation in a separate process
- Quadruple hydrodynamic painting with four coats of waterbased transparent paint from the STOLPAW stain range.
   STOLPAW or opaque colours from the RAL palette at an extra charge.

### Standard equipment /

- Stolpaw lever handle + fitting in colour F6 INOX
- Class A cylinder single key system (colour satin nickel)
  - Outside 45 x 50 mm Inside 50 x 45 mm for STOLPAW handles
  - Rear 45 x 55 mm ext. 55 x 45 mm for handles (ODIN, SOLOGAJA, PRESTIGE, DIVA)
- Four 3D-adjustable hinges
- Two independent LOB locks main lock with 72 mm spacing
- Adjustable lock for the main lock in the door frame
- Anti-theft rebate on hinge side
- Reflective glazing to reduce transparency, Two-chamber glazing with low emissivity and warm frame
- Wooden threshold with aluminium cap strips or aluminium with gasket

## Dimensions /

- Typical Sz = 1000mm and Hz = 2080 mm
- Dimensions up to Sz = 1040mm Hz = 2150 mm without surcharge
- Non-standard for individual pricing

## Fittings against surcharge

- Sash and frame made of 100% oak material
- Inserts KL. B or KL. C one key system
- KL. C strip lock, 92 mm span 3-point locking system
- Electric door opener
- Antabs
- Overhead or concealed door closer
- Glazing: sandblasted, P4, Venetian mirrored, black antisol
- Threshold in warm aluminium

# **Panel door Vintage**

Not only for single-family houses, but also for flats, coffered doors offer a high level of user comfort, a sensational look and high quality security. The door manufacturer Stolpaw Albud Drzwi offers models that are timeless and at the same time in line with current trends. Smooth or with various decorative glazing - the choice is yours! Quality and safety are our top priorities, which is why the glass is particularly durable. We successfully manufacture panel doors with non-standard dimensions. You can choose a ready-made model or commission an atypical design, depending on your specific ideas and individual project. Our panel doors are a guarantee of precision and customer satisfaction, not only when you buy them, but also when you use them, which proves to be very pleasant in everyday life for all members of the household.

## Frame and panel doors

Frame and panel doors are becoming increasingly popular and are by far the most popular product due to their timelessness and versatility. Whether you are renovating a property or building a home from scratch, choosing the right frame and panel door is crucial to completing any home project. Frame and panel doors are a combination of classic doors and modern design. The high quality of workmanship combined with a robust and contemporary shape offers you an interesting alternative to classic and modern doors. With their characteristic shape and high-quality materials, we offer you a unique and durable product that will stand the test of time. The use of glazing and stainless steel fronts makes the frame panel door timeless.

## frame and panel doors

Doors in frame and panel construction are characterised by their traditional appearance. The construction consists of a frame made of laminated wood. In the frame there are vertical and horizontal mullions called transoms. They brace the entire door construction. The muntins divide the surface of the door leaf into smaller areas called panels, which are filled with thermal insulation material. Thanks to their originality, frame and panel doors are very popular with customers who appreciate classic and traditional solutions. and traditionalism.

# Intelligent security home

With a unique fingerprint or access code on a smartphone app, you can be sure that only authorised people can enter the building. There is also no longer any need to look for or carry around a key - all you need is a smartphone or fingerprint to open the door. This is especially useful for people who frequently change their handbag or trouser pocket and don't want to waste time looking for a key. Smart doors also save time and money. Thanks to them, it is no longer necessary to change locks or keys when someone has lost theirs. It is enough to change the access code or remove the fingerprint from the system to prevent access for people who should not have access. Should have access.

## Modern solutions at your fingertips

01.

#### FINGER-SCANNING TECHNOLOGY

Fingerprints are scanned through the reader's sensor to identify a person's fingerprint. With the BioKey 4000 software, up to 50 minutiae (fingerprint characteristics) can be stored. For authentication, the person swipes their finger over the sensor and if the scanned characteristics match the parameters stored in the system, doors and locks open. BioKey is highly security certified and has good recognition performance, even with small finger injuries or growing children's fingers. In the standalone version, access control can be programmed directly at the door and up to 150 different finger patterns can be stored. It is suitable for both private use and small/medium businesses.

#### **SYSTEM EASY APP**

This solution allows access to rooms without the need for mechanical keys.

#### **ADVANTAGES:**

Simple installation

Safety

**Savings** 

**Flexibility** 

#### **SPECIFICATIONS:**

- Access to premises without additional mechanical keys
- for smartphones with the operating systems Android and iOS with Bluetooth interface
- secure and convenient management of access authorisation from smartphone and Mifare transponders
- individual access authorisation for each user
- The system can be expanded at any time during operation
- Maximum number of system users 250
- Maximum number of doors in the system 25
- Up to 1,000 historical events with date and time on the screen Smartphone
- Activation of the cylinder coupling for one-time opening or permanently

#### ADDITIONAL INFORMATION:

- Maximum number of users per system 250 people
- Maximum number of doors per system 25 units
- Display of up to 1,000 historical events on the smartphone with date and time
- Bluetooth encrypted communication (AES-128)

#### **Concealed door system STOLPAW**

The STOLPAW DISCRET concealed door system creates the effect of a door perfectly flush with the wall. When the door is painted in the same colour as the wall, the effect of continuity of wall and door in the room is created. We offer a frame for inward and outward opening doors, both right and left. The Visio door system is based on a universal, powder-coated aluminium frame equipped with elements that allow precise mounting and are suitable for all standard built-in hinges. A frame profile with or without a top beam (if the door is only mounted on the ceiling) can be used.

Wing construction based on glued laminated timber made of glued laminated timber

The filling of the sash consists of Chipboard

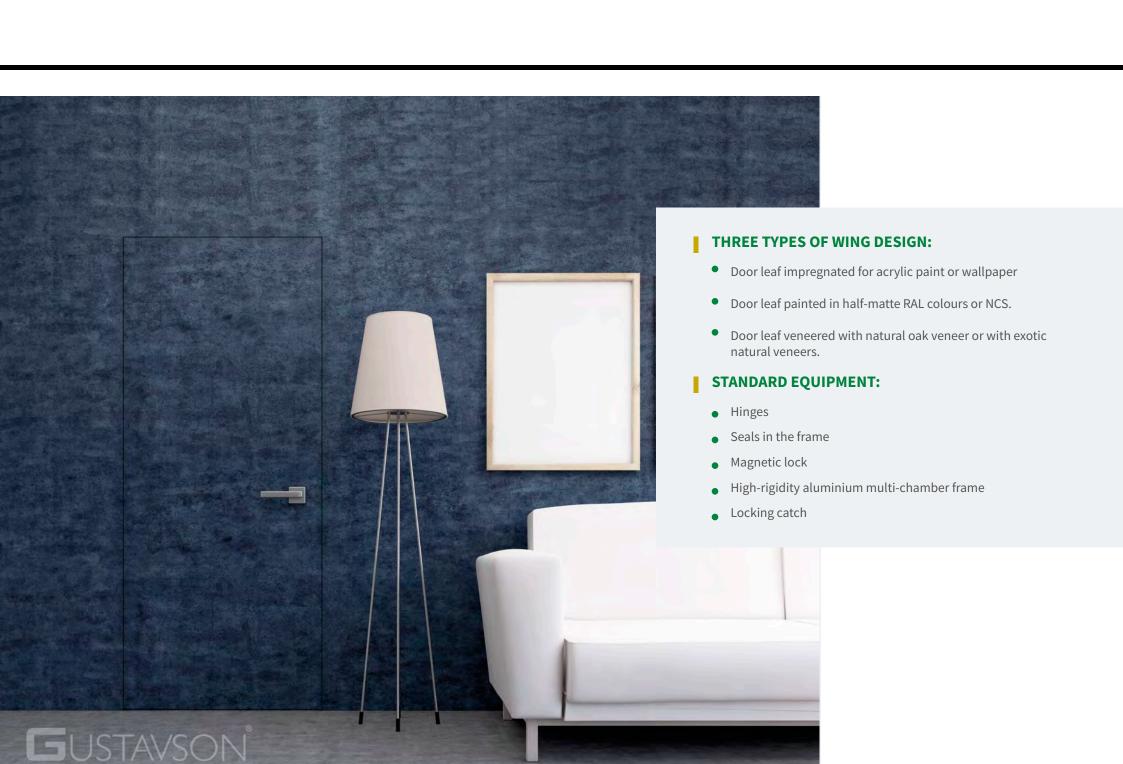

Outer sheathing
- HDF board

#### **ADVANTAGES OF STOLPAW DISCRET**

- High stability and rigidity due to special profiles
- Reinforced corners of the inner angles secure the construction at corner joints
- wide application range of the system up to 2.5 m installation height with a sash width of 1.2 m for loads up to 100 kg
- thanks to special frame profiles, the system is compatible with most hinges on the market
- with most commercially available hinges
- the universal frame allows the system to be used with plasterboard and plasterboard and brick walls
- the frame can be painted with wall paints as it is pre-painted with white primer
- the unique construction of the profiles avoids the airbag effect
